

## Scaldis Salvage & Marine Contractors

### Disassembly and transportation of gas extraction platform

MULTI.engineering has been entrusted with the responsibility of overseeing the project's engineering aspects, ensuring the safe and efficient removal of platform components. These components will subsequently be transported to a refurbishing yard, where the platform will undergo storage and preparation for future use.

The two primary concerns centered on ensuring safety for both workers and the environment, and adhering strictly to project timelines.

#### CLIENT

Scaldis Salvage & Marine Contractors  
Scaldis is an offshore heavy lift contractor offering an economical solution for the refurbishing and decommissioning of obsolete oil and gas installations.

#### SCOPE

Project engineering for the removal of components of a gas extraction platform and their transportation to a refurbishing yard.

#### LOCATION

Antwerp

#### ADDED-VALUE MULTI.ENGINEERING

The MULTI.engineering expert swiftly became an integral part of the client's team, contributing effectively to workload management.

**NO ENGINEERS, NO FUTURE !**
